

"Key Features"

【Bread Factory】
No need pre-works.
Just-in time measurement.

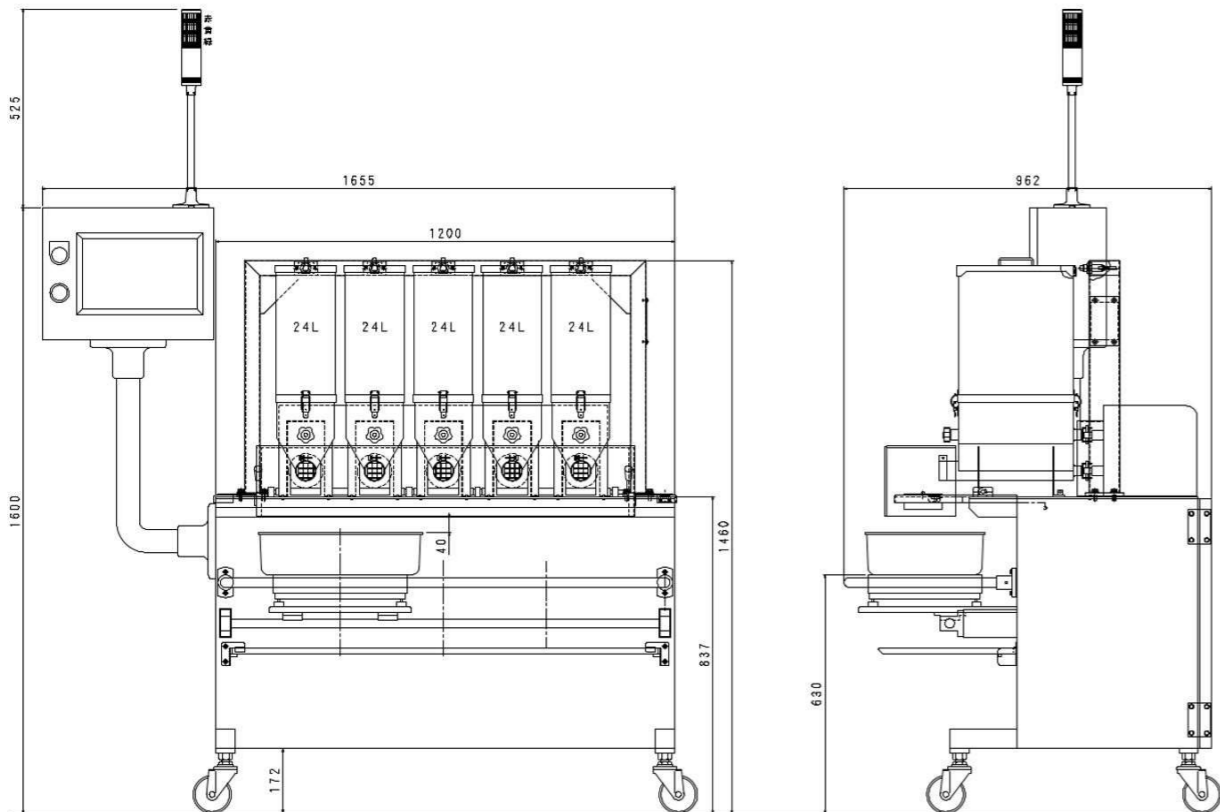

【Cake Factory】
Support for various products.

Standard Specification

Items	Specifications
Type	PAMS-04
Hopper Capa. & No.	24 Litters x 5
Measurement Range	50 g to 10 kg
Measurement Speed	1.2 KG/min. (sp. 0.6)
Accuracy	+/- 3g (depend of material)
Operation Conditions	5 ~ 40 °C with 20 ~ 90% RH (no condensing)
Power	1φ AC110/115V(5A)

●Contact us for custom design such as hopper capacity, numbers and other special requirements

You can see the weighing video here.

Automatic Ingredient Batching System
Lots of applications in Bread, Cake and other

“Weighing mistake” “Forgot to put in” “Put in twice”

No More Human Errors and Mistakes
Absolutely Saves “ Time ” and “ Labor ”

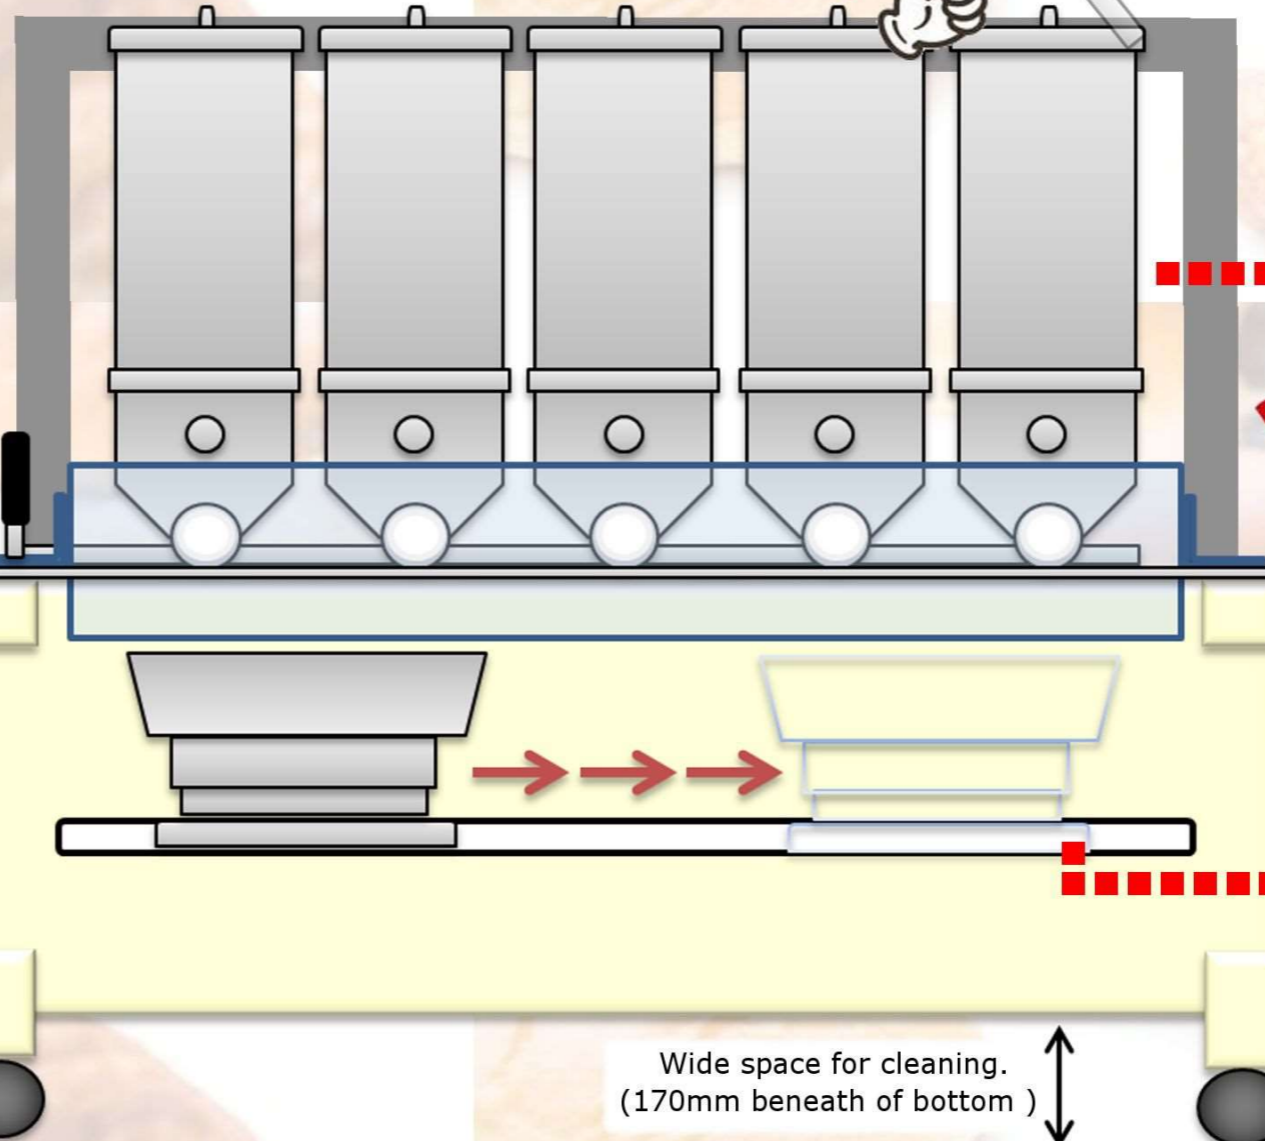

Perfectly solve human errors and mistakes by RECIPE
 No more mixing calculation and individual switching,
 just input pre-setting data.
 RECIPE is working automatically without operators assistant.
 Sound and Light are notifying the completion of measurement.

Various setting and tuning to be available by different operation conditions and installed many functions such as drop speed adjustment, accuracy limitation due to variety of specific gravity Display of error histories and data correction by Excel format (SD card)

During operation, when the hopper lid is removed, the rotation of the stirring blade and screw stops. After restoration, it can be restarted continuously.

Disassembling without tools and easy washing for clean. (You can see the decomposition method video here)

Standard Hopper Capacity 50, 36, 24, 10 and 3 Liters Custom design of number of hopper and capacity to be available.

Easy hopper disassembling.

Automatic travelling of measurement pan.
